

Backflow Test & Repair

EcoWise Irrigation LLC

Protecting your water supply and ensuring full municipal compliance.

What it is

Backflow prevention assemblies are critical to safe guarding municipal and private water systems from contamination. Our certified technicians provide backflow testing, maintenance, and certification for commercial, residential and industrial properties

What it involves

What backflow services do we offer

Annual Compliance Testing - Certified inspection and testing of cross-connection control devices to meet state and local water authority regulations.

Device Repair & Overhaul - Rapid replacement of worn check valves, relief valves, and internal seals using OEM parts to restore failed assemblies.

New Installation & Retrofits - Complete installation of RPZ (Reduced Pressure Zone), DCVA (Double Check Valve), and PVB (Pressure Vacuum Breaker) units.

Pricing

Pricing depends on the backflow type and service required

	Residential Irrigation	Commercial Up to 2"	Large Industrial
Testing	\$135 for initial device \$75 per extra device	\$200 for initial device \$100 per extra device	\$400 for initial *** \$200 per extra device
Repairing	Hourly rate plus parts*	Hourly rate plus parts	Hourly rate plus parts
Replacing	Hourly rate plus parts	Hourly rate plus parts	Hourly rate plus parts
Re-testing**	\$50	\$100	\$200

Anytime a backflow is installed, repaired or replaced its has to be tested and the results submitted to the local water purveyor. This is included in the cost of the test. If a backflow fails a test and requires a repair or replacement the cost of parts or repair is not included in the test fee.

If a backflow needs to be worked on and there is no isolation valve one must be installed, at the hourly rate plus parts

Any areas around the backflow that need to be cleared to make it more accessible/safer will incur an additional clearing fee charged at the hourly rate.

Additional devices tested on the same visit for the same property address have a reduced testing fee.

* Hourly rate is \$100 per hour with a 1 hour minimum.

** If a backflow is tested and fails therefore requiring repair/replacement a re-test fee will be applied

*** Below grade vaults requiring confined space gear will incur additional charges.
