

Sprinkler School

EcoWise Irrigation LLC

Learn the basics of your irrigation system in this one to one lesson

What it is

Sprinkler school is a one on one lesson for new homeowners or people who would like a better understanding of their irrigation system. We teach you how to operate your irrigation system and how to identify basic maintenance requirements, from the meter to the spray heads.

What it involves

Here is a breakdown of what happens during spirnkler school.

- Location of water meter
- How to shut it off
- Location of isolation valve, how to shut it off
- Location of Backflow and how to shut it off
- Identifying Valves*
- Using the controller
- Defined irrigation/restrictions**

*Identifying the valve to the client, does not include valve locating using a locating device.

**If your area has a defined irrigation schedule or watering restrictions, this will be discussed with regards to running irrigation

Pricing

Pricing for this service is set at \$100 per person per session.
