

Tracing & Location Services

EcoWise Irrigation LLC

Uncover your Irrigation system

What it is

If you have lost or buried irrigation valves it can make system repairs, zone troubleshooting and routine maintenance frustrating and expensive. We provide professional electronic valve location services to pin point buried solenoid valves, trace wire paths and expose hidden manifold boxes without damaging your lawn.

What it involves

Whats included in the service

- Application of specialized valve locators and wire tracing equipment to track underground wiring directly to hidden valves.
- Careful hand-digging to uncover lost valve boxes, clean out dirt or debris, and inspect physical conditions of equipment*
- Multimeter diagnostics on wire continuity, solenoid resistance (checking for standard 20-60 ohm readings), and voltage at each valve.
- High-visibility surface flagging and marking of each located valve box for easy future access, as well as zone number marking on Boxes
- Replacement of damaged valve boxes and lids**

*If leaks or issues are identified the homeowner/property manager will be notified prior to any work being carried out

**Cost of parts will be additional

Pricing

Pricing for this service is set at the standard hourly rate* plus cost of any parts used.

*Hourly rate is \$100 per hour with a 1 hour minimum.
